Request for Pre-Power

REQUEST FOR PRE-POWER

**Altamonte Springs, Casselberry, Lake Mary, Longwood, Oviedo, Sanford,
Seminole County, Winter Springs**

Date: _____

Project Name: _____ Project Address: _____

Building Permit#: _____ Electrical Permit #: _____

In consideration for authorizing the appropriate utility company to energize the facility, we agree with and understand the following:

- | | |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. | The facility will not be occupied until a certificate of occupancy has been issued. |
| 2. | If the jurisdiction hereafter finds that the facility has been occupied before a certificate of occupancy has been issued, the jurisdiction will have the unilateral right to direct the utility to terminate electrical service without notice. Furthermore, we understand and agree that should the jurisdiction exercise such right, the jurisdiction will not be responsible for any damages or costs which may result from the exercise of such right. Also, in the event any third party claims damages from the exercise of such right, we agree to jointly and individually indemnify and hold harmless the jurisdiction from all such damages and costs, including attorney's fees. |
| 3. | The building or structure shall be weather tight and secure. The electrical wiring in the area designated for pre-power shall be complete and in safe order. All electrical services associated with the area will be 100 % complete unless specifically approved by the electrical inspector. |
| 4. | Interior electrical rooms shall be lockable, if electrical panels are in an area that cannot be locked by |

	doors, the panels shall be equipped with a locking mechanism (approved by the AHJ). The licensed electrical contractor or his licensed representative shall hold the keys (s) for such access to electrical panels to prevent energizing circuits other than those that are safe.
5.	If provided, the fire sprinkler system must be operational, per the local AHJ requirements, with water on the system prior to pre-power.
6.	This pre-power approval is valid for a maximum of 180 days from date of approval.
7.	Check with the local jurisdiction for fees associated with pre-power.
